Testing and Certifying of high performance LAN networks
### Completely meets TIA CAT6/ ISO Class E demands

- Tests installations up to 350MHz (this is beyond CAT6, Class E specifications).
- Complete function range, including ELFEXT and PowerSUM measurements.
- Supports all cable types.

Easy to work

- Fast Autotest function.
- Big, high resolution graphic display.
- Storing of up to 2000 Autotests.
- Communication talk set.

Powerfull troubleshooting tools

- In built high performance TDR meter
- Cable Identifiers
- One Side Wire Map test

Professional accessories and adapters

- High performance Universal Permanent Link and Channel Adapter.
- Excellent quality of measuring connectivity components.
- Wide range of optional accessories

Professional PC software

- Documentation of measuring results.
- Certification and Test Reports
- Analysis of TDR signals
- Analysis of frequency plots.

Best price / performance ratio

- New DSP approach
- Simple to upgrade
